Weight:
40-100 pounds
(18.1-45.4 kg)

Height:
43- 57 inches
(110.1-144.8 cm)

and at least 4 years old

Read all instructions BEFORE USING
this child restraint.
KEEP INSTRUCTIONS FOR
FUTURE USE.

⚠ WARNING
Failure to follow the warnings on the labels and in the instruction manual can result in the death or serious injury of your child.

Before You Begin...

Thank you for choosing this car seat, referred to throughout this manual as a child restraint. The DJG family is committed to creating a child restraint with the most comfort and convenience available today.

Remember, parents are a child's first teachers and examples. If you always buckle your seat belt, your child will think it is the natural thing to do. Make it a firm rule that the vehicle does not go until everyone is buckled up. Make no exceptions.

No one can predict if use of a child restraint will prevent injury or death in a particular crash. However, combined with careful driving, proper use of a child restraint can lower a child's risk of injury or death in most crashes.

Your child's safety is worth the time it will take to read and follow these instructions. After reading, if you still have questions or have any problems with this child restraint, please contact our Consumer Relations Department at:

On the bottom of the shell there is an expiration date for use of this child restraint. Do not use this child restraint after the expiration date.

WARNING

Failure to follow these warnings can result in the serious injury or death of your child. To help you recognize those instructions which are most critical for your child's safety, we use this symbol :

-  According to accident statistics, children are safer when properly restrained in the rear seating positions than in the front seating positions.
-  Check vehicle instructions for more information about air bag/child restraint use.
-  For vehicles with an air bag, but without a back seat, refer to your vehicle owners manual.
-  The vehicle belt must stay tight at the belt path. If it doesn't, it could cause serious injury or death to your child.
-  Never take your child out of the child restraint or try to tend to your child's needs while the vehicle is moving. Never leave child unattended.
-  Do not use a child restraint with damaged or missing parts.

WARNING

-  Do not substitute parts or try to modify the child restraint in any way.
-  Do not use a child restraint that has been in a crash. You must get a new child restraint.
-  Use the child restraint only on vehicle seats that face forward. Do not use on seats that face the sides or rear of the vehicle.
-  Check the vehicle belt before each use. Use only if the belt can be tightened properly and securely.
-  This child restraint should be securely belted in the vehicle even when not in use. In a crash or sudden stop, an unsecured child restraint could injure other occupants.
-  Do not use this child restraint if the tops of your child's ears are above the top of the vehicle's seat back or vehicle's headrest.
-  Dorel Juvenile Group does not recommend the use of any child restraint accessories except those recommended by DJG.
-  Never allow any child to play with this child restraint. It is not a toy.

WARNING

-  Do not remove any of the warning labels or other labels on the child restraint.
-  Placing your child in a hot child restraint may result in burns.
-  Read instructions for other warnings.

Aircraft Installation

This child restraint is not certified for aircraft use. Aircraft seats are not equipped with lap/shoulder belts, which are required for use with this child restraint.

General and Warm Weather Use

To help protect your vehicle seat's upholstery from damage, use a seat protector or a towel underneath and behind child restraint.

To avoid your child being seriously burned, take the following precautions:

1. Park in the shade or where sun does not directly hit the child restraint.
2. Cover the child restraint with a sheet or blanket when not in use.
3. Check for hot seat and buckles before placing child in child restraint.

Registration and Recall Information

Child restraints could be recalled for safety reasons. You must register this restraint to be reached in a recall. Fill out the registration card attached to the child restraint or send your name, address and the restraint's model number and manufacturing date to:

Dorel Juvenile Group, Inc.

P.O. Box 2609, Columbus, IN 47202-2609

Attn: Consumer Relations or call 1-800-544-1108 or register online at www.djgusa.com/registration/carseat/us. Do not send in your registration card if you registered your child restraint online.

For recall information, call the U.S. Government's Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153), or go to <http://www.NHTSA.gov>.

Knowing Your Vehicle Belts

This auto booster must only be used in vehicles with appropriate vehicle belts that can be tightened securely. **If the vehicle belt cannot be tightened securely, it must be replaced. This booster MUST only be used with a lap/shoulder belt.** Belt systems which will not work with this child auto booster (or sometimes any child restraint) include, but are not limited to, the following:

- **Do not use with any automatic/passive vehicle seat belt.**

An automatic (passive) 2-point belt has no lap belt. You must install a lap belt to secure a child restraint. You may also need to install an extra lap belt for an automatic (passive) 3-point belt. Refer to the vehicle owner's manual.

- **If your vehicle belt is too short, contact your vehicle dealer for a seat belt extender. Do not route the seat belt any way except as shown in the instructions.**
- **If the belts come out of the center of the door or side panel or middle of the vehicle seat cushion (so that they are forward of the bight), you must move the auto booster to another seating location** (See diagrams A and B).

seat.

Some vehicle belts will not
work with a child restraint.
See previous page for
specific instructions.

Belt-Positioning Booster Installation

Place child restraint
against the back of
the vehicle seat. Place
the child's bottom
flat against the child
restraint and child's
back, flat against the
vehicle seat back.

NOTE: Make sure back
of armrests are against
the back of the vehicle
seat

Booster: 40-100 lbs. (18.1-45.4 kg), 43-57" (110.1-144.8 cm), and at least 4 years old.

Place lap belt across child's thighs. Lock buckle. The shoulder belt should lay snugly across the center of the child's shoulders and across the chest (not on the face or neck). Pull up on the shoulder belt to tighten belt snugly.

NOTE: A snug belt should not allow any slack. It lies in a relatively straight line without sagging. It does not press on the child's flesh or push the child's body into an unnatural position.

NOTE: Make sure the lap and shoulder belt are placed under armrest as shown.

Check periodically to ensure your child has not moved out of position and loosened the shoulder belt.

NOTE: A snug belt should

⚠ WARNING

Do not use this child restraint if the tops of your child's ears are above the top of the vehicle's seat back or vehicle's headrest.

⚠ WARNING

Check vehicle instructions for more information about air bag/child restraint use.

Do Not Use only the lap belt when using this seat.

The shoulder belt must always be adjusted snugly across the child's chest.

NEVER place the shoulder belt under the child's arms.

Use only the vehicle's lap and shoulder belt system when restraining the child in this booster seat. Failure to do this can result in serious injury or death.

Do not use this child restraint if the tops of your child's ears are above the top of the vehicle seat back or headrest.

Failure to follow these warnings could cause serious injury or death to your child.

Removing Seat Pad for Cleaning

Remove seat pad by reversing order in the “Preparing Child Restraint” section.

Hand wash with warm sudsy water, rinse clean and air dry. Do not use bleach or other harsh cleaners. Do not dry clean.

Replace seat pad by revisiting the “Preparing Child Restraint” section.

Troubleshooting

1. If your child restraint is not held securely by the vehicle belt:

Remove all the slack in the vehicle belt. Make sure the belt buckle is not up against the child restraint where the belt cannot be tightened. If you cannot secure the child restraint tightly, move it to another seating location.

2. If the shoulder belt crosses the child’s neck when using the child restraint:

Try moving the child restraint toward the center of vehicle or move the vehicle seat forward or back. Check to see if your vehicle has adjustable shoulder belt anchor points. **Do Not** place the shoulder belt behind the child.
