## A-1 Thank You...

Thank you for choosing this child restraint. The DJG family is committed to creating child restraints with the most comfort and convenience available today.

Remember, parents are a child's first teachers. If you always buckle your seat belt, your child will think it is the natural thing to do. Make it a firm rule that the vehicle does not go until everyone is buckled up. Make no exceptions.

No one can predict if use of a child restraint will prevent injury or death in a particular crash. However, combined with careful driving, proper use of a child restraint can lower a child's risk of injury or death in most crashes.

Your child's safety is worth the time it will take to read and follow these instructions. After reading, if you still have questions or have any concerns with this child restraint, please contact our Consumer Relations Department at:

### Safety Tips

Children are safer when properly restrained in rear seating positions than in the front seating positions. According to National Highway Traffic Safety Administration information, children in rear seating positions are statistically safer, whether you have air bags, advanced air bags, or no air bags at all.

**To avoid your child being seriously burned, take the following precautions:**

1. Park in the shade or where sun does not directly hit the booster seat.
2. Cover the booster seat with a sheet or blanket when not in use.

To help protect your vehicle seat's upholstery from damage, use a single layer towel underneath and behind booster seat.

### D-3 Knowing Your Vehicle Belts

Review your vehicle's owner manual for vehicle seat belt use with child restraints. This is your best source for information concerning your vehicle. There are some vehicle belts that will not work with a booster seat or will require special attention. You must determine if your vehicles belts are compatible with this booster seat.

To help determine this, review next page.
